

## **Frequently asked questions Magic Pod**

### **1. What is the range of Magic Pod?**

The Range of Air Pod is 10 meters in line of sight. However, the range is affected by obstacles or high frequency environment.

### **2. Can the Magic Pods be charged via Case?**

Yes, Magic Pods can be charged via case. Initially, when the charging cable is connected to case, the case as well as the Pods get charged. Upon discharge the pods can be charged twice via case.

### **3. What is the process for pairing the Magic Pod to smart device?**

Once turned ON, Both the Magic Pod earphones will automatically pair with any paired smart device.

If not paired, then In Bluetooth settings of smart device, search for new device (Bluetooth Name). Click on connect to Bluetooth.

While not paired, the red and white LED blinks continuously for both earphones. After pairing, there is no LED indication.

Earphones will turn off if they can't sync within 5 minutes.

#### 4. How can we use the audio calling feature in Magic Pod?
