1. Precautions

Protection against Water: Keep device in dry locations and avoid damp and humid environment.

For better performance:

- Fully charge the unit before operating for the first time.
- Do not Overcharge the battery in regular use (If Red LED on Case is Stable).
- Do not expose the device in extreme heat or cold.
- Use only approved cables and chargers.

2. Magic Box Accessories

1. Magic Pod Dust cover
2. Multi-Function Touch Button
3. Microphone
4. Charging Port (Magic Pods)
5. Charging Port (Case)

3. Setting up of Magic Pod

Bluetooth Pairing with Smart device

Once taken out of Magic Pod Case or turned ON, both the Magic pods Bluetooth is turned on and the LED (Red and Blue) will blink continuously.

Magic Pods are based on True wireless Stereo technology.

Case 1: Both Magic Pods ON:

Mirroring ⟶ Master ⟷ Slave

Once turned ON, both the magic pods first pair with each other in a process known as **"Mirroring"** over a Bluetooth link. In this one Magic pod is the Master and the other **Magic pod** is Slave.

Note: After Mirroring, the master magic Pod's LED (Red and Blue) will blink continuously indicating that it is searching for **smart device** and the slave LED will blink (Blue) in every 5 seconds indicating that it is paired with Master.

Pairing ⟶ Master ⟷ Smart device

After Mirroring phase, Master Magic Pod still searches for the Bluetooth smart device. The Master Magic Pod will automatically pair with any paired smart device and the Master LED will blink (Blue) in every 5 seconds indicating that it is paired with Smart device.

If not paired, then In Bluetooth settings of smart device, search for new device (Bluetooth Name). Click on connect to Bluetooth.

Magic Pods will turn off if they can't sync within 5 minutes.

Mirroring ⟶ Master ⟷ Slave
Not Applicable

Pairing ⟶ Master ⟷ Smart device

In this Case, The Magic Pod (Left / Right) still searches for the Bluetooth smart device. The Magic Pod will automatically pair with any paired smart device and the Master LED will blink (Blue) in every 5 seconds indicating that it is paired with Smart device.

If not paired, then In Bluetooth settings of smart device, search for new device (Bluetooth Name). Click on connect to Bluetooth.

Magic Pods will turn off if they can't sync within 5 minutes.

4. Charging Magic Pod

ⱴ **Charging via USB cable:** Charging cable when connected to Magic Pod Case, both Case and Magic pods get charged.

ⱴ **Sequence of light on Case**
   Red LED blinks, while the Case and magic podsare charging.
   Red LED is stable, while both, Case and magic pods are charged.

ⱴ **Charging Via Case:** Magic pods can be charged by simply placing them inside the Case.
   Sequence of light on Case
   Blue LED is lit, while Magic Pods are charging via Case.
   Red LED is litwhere Magic Podsare placed.
   Both LEDs turn OFF once Magic Pods are fully charged.
